White Rose Maths 3.0 and New PUMA

For schools who follow the White Rose 3.0 sequencing exactly, the latest changes to the teaching order mean that some content in our termly maths assessments will fall ahead of when you now plan to teach it. You may therefore wish to review your order of teaching, or perhaps consider revised testing windows, allowing more time for content to be taught before reviewing pupil understanding. Read our summary of the impact of curriculum changes on your assessments:

New PUMA Autumn: For New PUMA users, the order detailed in White Rose 3.0 now means that some assessed content is sequenced for teaching in later terms.

Year	Marks worth of assessed content now not taught until Spring/Summer White Rose 3.0	Assessed topics not taught until Spring/Summer WR 3.0
1 PUMA Autumn	2	Place value within 20, Days
2 PUMA Autumn	7	Multiplication & Division, Statistics
3 PUMA Autumn	5	Money, Statistics
4 PUMA Autumn	7	Multiplication & Division, Money
5 PUMA Autumn	10	Perimeter & Area, Statistics
6 PUMA Autumn	5	Ratio, Shape

New PUMA Spring: For New PUMA users, the order detailed in White Rose 3.0 now means that some assessed content is sequenced for teaching in later terms.

Year	Marks worth of assessed content now not taught until Spring/Summer White Rose 3.0	Assessed topics not taught until Summer WR 3.0
1 PUMA Spring	3	Fractions, Months
2 PUMA Spring	6	Fractions, Statistics
3 PUMA Spring	14	Fractions, Statistics, Money
4 PUMA Spring	5	Decimals, Statistics, Money
5 PUMA Spring	8	Decimals, Position & Direction
6 PUMA Spring	2	Position & Direction

Tip: If delaying testing works in your school, the optimum delay would be to re-schedule your Spring testing window to 3 weeks into the summer term, which would ensure they are taken after the assessed content has been covered. This would have particularly impact in Year 3, but across all years would reduce content in tests that hasn't yet been taught to 0-4 marks.

Suggested alternative testing window for all years: week 3 in the summer term.

New PUMA Summer: all summer tests assess the content taught during that year and prior years, so no matter the order of teaching you can continue to use our summer tests with confidence that the assessed content reflects the maths you've taught in your school.
